**IMAC 1964 - 2024**

### **Tutto iniziò nel 1964**

quando Piero Gattazzo fondò IMAC con una visione audace: prevedeva che in un futuro poco lontano gli animali domestici sarebbero diventati parte integrante delle famiglie. L'azienda intraprese così la produzione di gabbie per ornitologia e piccoli mammiferi.

IMAC ben presto conquistò l'attenzione internazionale grazie alla partecipazione alle principali fiere del settore. La chiave del successo fu la dedizione alla qualità e la continua ricerca di habitat sempre più adatti agli animali.

### ***It all began in 1964***

*when Piero Gattazzo founded IMAC with a bold vision: he foresaw that pets would soon become an integral part of families. The company thus began producing cages for birds and small mammals.*

*IMAC soon captured international attention by participating in major trade fairs. The key to success was a dedication to quality and the continuous search for increasingly suitable habitats for animals.*

## Espansione e Innovazione

Verso la fine degli anni '80, IMAC ampliò ulteriormente la sua gamma introducendo un reparto dedicato allo stampaggio di materie plastiche. Questa mossa strategica non solo ampliò l'offerta di prodotti, ma diede anche un notevole impulso alla crescita aziendale. L'impegno costante verso la fusione di qualità e design divenne una caratteristica distintiva dei prodotti IMAC. All'inizio del decennio 2010, per rispondere alle esigenze del mercato, l'azienda ha incrementato la propria gamma di articoli con l'importazione di prodotti a proprio marchio.

## Expansion and Innovation

By the end of the 1980s, IMAC further expanded its range by introducing a department dedicated to plastic moulding. This strategic move not only expanded the product offering but also gave a significant boost to business growth. The constant commitment to merging quality and design became a distinctive feature of IMAC products. In the early 2010s, to meet market needs, the company increased its product range with the importation of IMAC branded items.

Posatoio a forma di ramo con diametri da 10 a 14 mm.  
Questo posatoio permette di variare continuamente la presa delle zampe rendendo l'utilizzo simile a quello che si trova in natura; in questo modo gli uccelli possono esercitare la muscolatura che con i posatoi tradizionali non userebbero.

A branch shaped perch with a diameter from 10 to 14 mm. This perch requires the bird to continually vary the stance of its feet, like it would in the wild; this enables the bird to exercise muscles that it would not normally use with a traditional perch.

### Sabbia super agglomerante bianca

### White clumping cat litter

10 L

La lettiera "agglomerante bianca" deriva da bentonite minerale naturalmente bianca, la sua granula molto fine le consente di assorbire i liquidi velocemente formando così una piccola palla molto solida, in questo modo il resto della lettiera e il fondo della toilette rimangono puliti ed asciutti. Grazie alla rapidità di assorbimento e la super capacità agglomerante, questa lettiera vi consentirà un utilizzo prolungato.

The White Clumping Cat Litter comes from naturally white bentonite. The litter has fine granules allowing it to trap and absorb liquids quickly, forming small solid clumps, so the rest of the litter and the bottom of the toilet remain clean and dry. Thanks to the rapid absorption and the super-clumping capacity, this litter is made for prolonged use as it will stay effective for much longer than normal.

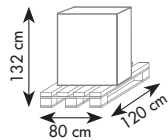

Granulometria - Grain size 0.5-1.5 mm  
Assorbimento - Liquid absorption > 250%

### Sabbia agglomerante profumata

### Clumping scented cat litter

10Kg

La lettiera agglomerante profumata è al 100% bentonite naturale di elevata qualità. Quando viene a contatto con i liquidi forma una palla molto solida e facile da togliere, in questo modo il resto della lettiera e il fondo della toilette rimangono puliti ed asciutti.

The Scented Clumping Cat Litter from Imac is composed of 100% high quality natural bentonite. When the litter comes into contact with liquids, small solid clumps are formed, which are easy to remove, so the rest of the litter and the bottom of the toilet remain clean and dry.

### Coffee tree

L'osso Java è ricavato dalla lavorazione del legno della pianta del caffè, dopo la potatura vengono selezionati i pezzi migliori e vengono poi lavati e levigati. L'osso è naturale, non puzza e non si scheggia.

Soddisfa il naturale bisogno di masticare. È l'ideale per i cani allergici essendo privo di additivi artificiali e componenti animali.

Il legno del caffè è molto resistente, durante la masticazione le fibre del legno si sciolgono ed hanno un effetto come se si utilizzasse il filo interdentale. Piccole parti possono essere tranquillamente ingerite e sono digerite senza problemi.

*The Java Bone is made of wood from the coffee plant. After pruning, only the best branches are selected and then washed and sanded for a smooth finish. The Java Bone is completely natural, extra strong, does not smell and it does not splinter.*

*The Java Bone satisfies the natural urge to chew and being completely non-toxic it is ideal for dogs with allergies because it is 100% natural and doesn't contain any animal or artificial ingredients.*

*Coffee plant wood is very resistant, the fine wood fibres melt when chewed and have a tooth brush effect, naturally cleaning the teeth. Small parts can be safely swallowed and are digested without problems.*
