Coffee tree

L'osso Java è ricavato dalla lavorazione del legno della pianta del caffè, dopo la potatura vengono selezionati i pezzi migliori e vengono poi lavati e levigati. L'osso è naturale, non puzza e non si scheggia.

Soddisfa il naturale bisogno di masticare. È l'ideale per i cani allergici essendo privo di additivi artificiali e componenti animali.

Il legno del caffè è molto resistente, durante la masticazione le fibre del legno si sciolgono ed hanno un effetto come se si utilizzasse il filo interdentale. Piccole parti possono essere tranquillamente ingerite e sono digerite senza problemi.

The Java Bone is made of wood from the coffee plant. After pruning, only the best branches are selected and then washed and sanded for a smooth finish. The Java Bone is completely natural, extra strong, does not smell and it does not splinter.

The Java Bone satisfies the natural urge to chew and being completely non-toxic it is ideal for dogs with allergies because it is 100% natural and doesn't contain any animal or artificial ingredients.

Coffee plant wood is very resistant, the fine wood fibres melt when chewed and have a tooth brush effect, naturally cleaning the teeth. Small parts can be safely swallowed and are digested without problems.

Corda con due nodi con legno del caffè Two-knot rope and coffee wood dog toy
